

useCamera: take input from camera instead of a video file

exit: exit the program

dataset: input dataset: 0: PETS2006 1: PETS2007 2: AVSS 3: Custom

set: set id of input video file (0-6 for PETS2006, 0-9 for PETS2007, 0-8 for AVSS and 0-18 for custom dataset)

view: view id of input video file (0-3) (only for PETS datasets)

size: size id of input video file (0-2) (will work only if the corresponding file is present in the input folder)

showBlobs: show all of the current blobs' bounding boxes (instead of showing only those in the tracking system)
