

frg%: foreground similarity ratio threshold (times 100)

simpleNCC%: minimum simple NCC for shadow candidate (times 100)

minRatio%: minimum frame to background intensity ratio for shadow refinement (times 100)

ratioStd%: maximum standard deviation of intensity ratio (times 100)

complexNCC%: minimum complex NCC for shadow candidate (times 100)

minIntensity: minimum pixel intensity for applying shadow detection at that pixel
